MODIVE

SAMPLING AND MEASURING LANCE MANIPULATOR OPERATED THROUGH EBT PANEL, LADLE FURNACES, TRIMMING STATIONS AND VACUUM DEGASSING

The **MODIVE** is a multiple axis manipulator designed to measure temperature, carbon/oxygen contents and take samples for steel chemical analysis automatically.

The manipulator is a “stand alone” piece of equipment that can be easily installed nearby the electric arc furnace EBT area or in the ladle furnace, trimming stations and vacuum degassing.

FEATURES

HIGH MOVEMENT
VERSATILITY
WITH 4 AXES

ANTI COLLISION
SYSTEM

EAF CAN OPERATE
WITH THE SLAG DOOR
CLOSED

**ZERO
MEN
AROUND**
